EXPERT ADVICE

Get professional guidance to choose

YOUR SATISFACTION, OUR PRIDE

Quality products, expert advice and excellent

Create a colour story for your space

1. Choose your main colour

Start with the mood you want: calm, fresh, warm, elegant or energetic. Use this shade on the largest wall areas.

2. Add supporting colours

Select lighter, darker or neighbouring colours to connect doors, trims, feature walls and adjoining rooms.

3. Use contrast carefully

A contrasting colour can create a focal point. Keep surrounding surfaces quieter so the feature remains balanced.

4. Confirm on the real surface

Lighting, sheen, texture and screen settings affect appearance. Always approve a painted sample before the final order.

Three useful colour approaches

Monochromatic harmony

Use variations of one colour family for calm, coordinated rooms.

Neighbouring colours

Blend colours that sit close together for natural and balanced transitions.

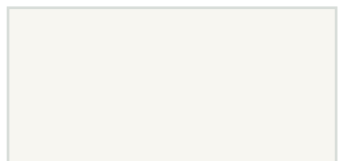

Complementary contrast

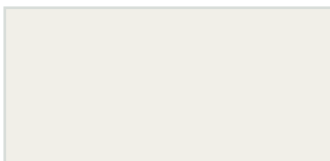

Pair opposite colour energies for bold and confident focal points.

Granite Paints Colour Collection
